OBJECTIVE

Driven First-Year Computer Science student with hands-on experience in Python and core algorithmic problem-solving. Seeking a Software Engineering Internship to leverage foundational programming skills, build scalable applications, and contribute to impactful software projects.

EDUCATION

B.E. in Computer Science & Engineering	2026 – 2030
<i>BMS Institute of Technology & Management</i> CGPA: –/10 (through Semester 1)	
Pre-University Course - PUC (Class XII)	2026
<i>Sindhi PU College</i> Karnataka Board 94.17%	
SSLC (Class X)	2024
<i>Federal Public School</i> ICSE Board 92.8%	

TECHNICAL SKILLS

Languages: Python, Java, SQL

Frontend: HTML

Databases: MySQL

Tools: Git, GitHub, Linux/Ubuntu

PROJECTS

LingoTrace	<i>Personal Project</i>
- Engineered an AI-driven computational linguistics web application to detect and analyze cross-linguistic interference (language transfer) across grammar, vocabulary, word order, and register dimensions. - Integrated Google Gemini 1.5/2.0 API with structured JSON schemas ('responseSchema') to enforce strictly validated output for 4-dimension score vectors, error token highlights, and native alternative phrasing. - Implemented error-resilient API routes with custom fallback parsing to gracefully handle malformed AI responses, network timeouts, and model endpoint updates. <i>Next.js, TypeScript, Tailwind CSS, Google Gemini API (LLM)</i>	
Additional projects: github.com/veridianspark
